Operating Instructions for The Micro-Particle Colloidal Silver Generator

Welcome to The Silver Edge

Congratulations on purchasing the world's best-selling colloidal silver generator for more than 25 years. With your new Micro-Particle Colloidal Silver Generator, you'll be able to produce high-quality micro-particle colloidal silver that is consistently crystal clear and effective, at a fraction of the cost of store-bought products.

Please take a few minutes to read these instructions carefully. Following them will ensure years of reliable operation and consistent results with every batch.

What's in the Kit

Each kit contains:

- One Micro-Particle Colloidal Silver Generator unit
- One removable airflow tube for easy cleaning or replacement
- One quart-size glass production jar with lid
- One set of pure .9999 fine silver rods (12-gauge, 6" length)
- One scrub pad to clean the silver rods after each use
- One six-foot removable power cord
- Travel/storage bag for easy portability
- Printed instructions (this guide)

If you purchased the optional Accessory Kit, you will also find:

- Two 4 oz amber glass bottles (mister and dropper)
- Three 2 oz amber glass bottles (mister, dropper, and nasal spray)
- One small funnel for easy filling

Simple Instructions for Making High-Quality Colloidal Silver with your Micro-Particle Colloidal Silver Generator

NOTE: To watch a video tutorial of these instructions, visit: <https://thesilveredge.com/vidclip/>

NOTE: It is vital that you read these instructions carefully before attempting to make your first batch of colloidal silver! To make high-quality micro-particle colloidal silver, you **MUST** use pure **steam-distilled water only**. Keep your steam-distilled water at room temperature. Do not use tap water, well water, reverse osmosis water, or any water other than pure steam-distilled water.

DO NOT ADD SALT OR SALINE SOLUTION WHEN MAKING MICRO-PARTICLE COLLOIDAL SILVER!

STEP 1 Prepare the Jar and Water –

Wash the production jar with mild soap and water, rinse thoroughly, and give a final rinse with steam-distilled water. Never use tap water, spring water, filtered water, or anything other than pure steam-distilled water. Fill the jar to the “fill line” or about one inch below the rim.

STEP 2 Insert the Silver Rods and Airflow Tube –

Insert the silver rods into the jacks on the underside of the generator. Push until fully seated. Attach the small airflow tube into the threaded port near the silver rods. Make sure the tube is positioned correctly so that it does not fall between the silver rods. Adjust if needed. Wipe both rods and tube with a paper towel dampened with steam-distilled water to remove any dust or fingerprints.

STEP 3 Place the Generator and Connect Power –

Set the generator on top of the jar so the rods and airflow tube are submerged. Plug the cord into the back of the unit and then into a GFCI outlet, for safety.

STEP 4 Set the Timer –

Turn on the generator by pressing the power button located on the back of the unit near the power cord jack. The LCD will display The Silver Edge → Select Run Time. Use the arrow keys to set your preferred runtime. We recommend 3–4 hours, which produces colloidal silver in the 7–10 ppm range. Time is adjustable in 30-minute increments, from 1 to 9 hours. Store favorite runtimes using the two programmable memory buttons  . Simply hold the M1 or M2 button for a few seconds to store the selected runtime. Press the start key  to begin brewing.

STEP 5 Water Quality Check –

When you press the start key , the generator automatically checks your water. The built-in water quality tester ensures your batch starts with the purest water possible. If water isn't pure enough, a Water Quality Bad message will appear. You can bypass this by following the prompt, but for the best quality colloidal silver, we strongly recommend turning the unit off by pressing the power button on the back of the unit and replacing the water with better-quality steam-distilled water, and repeating the previous steps until it passes the water quality check. We recommend keeping two or three brands of steam-distilled water on hand—quality varies by source.

STEP 6 Brewing Process –

Once the generator begins brewing, you can walk away. **The brewing process runs continuously until the timer finishes, and it will be silent between airflow cycles.** Every 10 minutes, the unit will activate the built-in air pump for 15 seconds to gently stir the water and evenly disperse silver particles. The LCD screen will dim to save energy—press any button to wake and view the remaining brew time.

**DO NOT
SKIP THIS
STEP!!!**

STEP 7 Completion and Auto Shut-Off –

At the end of the cycle, the unit will beep and shut off automatically. Your colloidal silver is now ready for use. Carefully remove the generator from the jar to prevent silver oxide from dropping into the finished batch.

IMPORTANT SAFETY WARNING: As with any household appliance that plugs into AC household current, there is risk of injury or death by electric shock if you place the plugged-in unit where it can fall, or be pulled, into an open source of water such as a tub, sink, or toilet. THEREFORE, YOU SHOULD NEVER USE THIS UNIT NEAR AN OPEN SOURCE OF WATER. Additionally, you should never use this appliance with a container that it can fall into the water. For maximum safety, it is always best to plug your unit into a GFCI outlet. Also, be careful not to allow the unit and production container to be knocked over during the colloidal silver-making process. If the unit falls into water, or water is spilled on or near it when it's plugged in, unplug it immediately. DO NOT REACH INTO THE WATER. Not for use by children. Warn children of the risk of electrical shock or death.

Storing Your Colloidal Silver

We recommend pouring your finished micro-particle colloidal silver into a clean amber glass bottle to protect it from light. If you purchased the accessory kit, use the included funnel to fill bottles easily. Store in a cool, dark place away from EMF exposure. Never refrigerate and never use plastic containers, which can leach contaminants. Properly stored, your colloidal silver will remain fresh and effective for months or longer.

Cleaning and Maintenance

After each batch, remove the silver rods and unscrew the airflow tube. Wipe the rods with the provided scrub pad to remove any silver oxide buildup. Wipe everything clean and dry, and store in the travel bag. Keeping your generator clean ensures consistent results.

That's it! Making your own high-quality micro-particle colloidal silver has never been easier. For questions or assistance, visit www.TheSilverEdge.com, call 1-888-528-0559, or email support@thesilveredge.com

Important Notes

Do not use saline solution. Some people mistakenly try to add salt to speed up the brewing process. This is dangerous and can result in the formation of silver compounds that are not safe for consumption.

Always use steam-distilled water. Purity of water determines purity of your colloidal silver. Avoid spring, filtered, or mineral waters. Refer to the Water Quality Checklist below for guidance on choosing the right water.

Rotate the silver rods between jacks periodically so they wear evenly. Always insert the silver rods into the jacks from the same end, and rotate them between jacks regularly so they wear evenly. Over time, the rods will thin as silver is released in the process. When they become too thin or brittle to handle, replace them with a new set of .9999 pure silver rods. You can order additional silver rods at www.TheSilverEdge.com or call 1-888-528-0559.

Steam-Distilled Water Quality Checklist

- Label must say "Steam Distilled" or "Processed by steam distillation."
- Ingredients should list only "Distilled Water."
- Avoid "purified water," "minerals added for taste," or spring water.
- Buy sealed, food-grade plastic jugs or glass bottles. Avoid dusty or dented containers.
- Keep unopened jugs in a cool, dark place.
- Never use water from a jug that has been open for more than a month or two.
- Signs of poor water quality include cloudy batches, excessive or darker silver oxide on the silver rods, or the unit refusing to start.

Tip: Keep at least two or three brands of steam-distilled water on hand so you always have one that passes the quality check.

Helpful Tips

- Never use metal containers to store or metal utensils to take colloidal silver as metal neutralizes the electrical charge held by the silver particles and impacts the potency.
- Always plug the same ends of the rods into the jacks to maintain a proper fit.
- Rotate rods between jacks so they wear evenly.
- Silver oxide buildup is normal; simply wipe rods clean after each use.
- If oxide flakes fall into the jar, strain through an unbleached coffee filter before bottling.
- The unit uses less electricity than a single light bulb.

Learn Even More

If you'd like to discover the many documented uses for colloidal silver, we highly recommend the 541-page book *The Ultimate Colloidal Silver Manual*. This comprehensive book has been called "the Bible of Colloidal Silver" and provides in-depth answers to virtually every question you could have about colloidal silver use. It is available directly from Life and Health Research Group. To order, call 1-888-846-9029 or online www.LifeandHealthResearchGroup.com.

Guarantee, Limited One-Year Warranty and Repair Information

Your brand-new Micro-Particle Colloidal Silver Generator is protected by our 30-day money-back guarantee of complete satisfaction. If you are dissatisfied, simply return it along with all components in new, re-saleable condition within 30 days, by calling for a Return Authorization Number at **1-888-528-0559**. Generators that are returned to The Silver Edge *without* a return authorization number will be refused. We are not responsible for the return to you of items we have refused to accept. Nor are we responsible for the condition of items that are refused. When returning a colloidal silver generator to us for ANY REASON, you will need to write the Return Authorization Number on the outside of your package, below or to the left of your return address. Also, please do not call to request an exchange or "trade-in" of this generator for other models, or vice-versa. We will not be able to honor such requests.

Your generator is warranted against defects in workmanship for one full year from the date of purchase. The warranty covers only the generator unit and its contents and power cord. It does not cover the silver wire, travel bag or other items included with the generator. If the generator unit fails to work call our toll-free number at **1-888-528-0559** so we can trouble shoot it over the phone and ascertain whether or not the unit needs to be returned for repair or replacement (at our discretion) and so we can assign you a Return Authorization Number. Additionally, it is important to note that your new Micro-Particle Colloidal Silver Generator is NOT warranted against damage due to neglect or abuse of any kind. Although this unit is built with the highest quality electrical components and has been specially constructed to last for a lifetime's worth of use, it is not indestructible. The customer is solely responsible for any damage caused by neglect, abuse or misuse.

Important Legal Notice

Nothing stated in this instruction guide should be construed to be medical advice for dealing with a given health condition. Nor should anything be construed as making medical claims for colloidal silver. The Micro-Particle Colloidal Silver Generator is not intended for use in diagnosing, treating, curing, or preventing any disease. You are solely responsible for your use or misuse of this product. A licensed health care practitioner should always be consulted before you embark on any course of treatment or prevention. As with any mineral or nutrient supplement, there is always the possibility of allergic reaction or harm of some kind. Some individuals are particularly allergic to minerals such as silver and should therefore not use colloidal silver. As with all household electrical products, there is a risk of injury or death due to electrical shock, which must be borne solely by you. Carefully read the important WARNINGS printed in these instructions.

By using the colloidal silver generator, you specifically agree to indemnify and hold Silver Bullet Health & Nutritionals, Inc. (d.b.a. The Silver Edge) harmless against any and all claims or liabilities arising from the use of any information or products sold by Silver Bullet Health & Nutritionals, Inc., including, but not limited to, the handling, operation, or application of such products by you or by anyone who obtains them directly or indirectly through you. By using the information obtained herein, or using or purchasing products, information, or services

described herein, you willingly assume all risks in connection with such use.
